

FRONTLINE INDUSTRIES LTD

INDUSTRIAL MAINTENANCE & CONSTRUCTION

INNOVATIVE SOLUTIONS

FRONTLINE Industries Ltd. specializes in customized electrical and mechanical services in the forestry, mining, and oil & gas industries. We also have experience working in pellet and biomass processing facilities, and offer industry training to get your team performing at their best.

FORESTRY

Providing top quality electrical and mechanical services for the forestry industry. With our team of highly experienced technicians we offer customized solutions to ensure smooth and efficient operations in sawmills, and pulp and paper mills, as well as secondary manufacturing like finger joint facilities and OSB plants.

MINING

Customized electrical and mechanical services for open pit and underground mining operations. Our team of highly knowledgeable professionals can properly diagnose, repair, and maintain mining equipment such as shovels, graders, trucks, loaders, and drill rigs, as well as wash plant facilities and related equipment.

OIL & GAS

Delivering top-notch electrical and mechanical services to the oil & gas industry. Our team of skilled experts offers customized solutions to ensure seamless and efficient operations. Whether you need mechanical installation, maintenance, or repair services, rely on us for all your oil & gas mechanical needs.

PELLET AND BIOMASS PROCESSING

Your go-to experts for electrical and mechanical services in the pellet and biomass processing industries. Our professional team delivers customized solutions to ensure smooth and efficient operations. Whether you need installation, maintenance, or repair services, we have the expertise to get the job done right.
